MacOS Mojave will allow third-party developers to make use of its dark mode and seeing the previous track record, many developers will be quick to implement it.. To change images, or to use images of your own, open the Desktop and Screensaver option in System Preferences.. The features include a dark mode, more organizational options, desktop versions of several iOS apps.

The update was announced at WWDC, Apple's developer conference and a public beta should be available this summer.. The official release date should arrive somewhere in fall Image credit: ArsTechnica As mentioned before, macOS Mojave finally has a real dark mode.. Although on Windows, the dark mode is not system-wide and incomplete Moreover, there are no third-party apps which can be turned dark with this system-wide setting.. Every Mac computer comes with dozens of free images you can use for your desktop wallpaper, including photos from National Geographic.. IOS Apps Keeping up with the trends of previous years, Apple is bringing more of its iOS apps to the Mac.
